Includes: Profile #1
CBC (Assesses anemia, clotting, and infection)

Initial You Choice Below:

I approve a Profile #1.

I approve a Profile #2.

I decline and understand that undetected abnormalities may increase the risks of complications under anesthesia.

An intravenous catheter and IV fluids are recommended during any surgical procedure to aid in decreasing anesthetic risk and support the pet during the surgery. **Cost: \$60**

I approve IV catheter and fluids during surgery.

I decline IV catheter and fluids during surgery

While your pet is sedated, we offer microchip placement. Cost \$44

I approve microchip placement. Email for registration: _____

I decline microchip placement.

Would you like for the growth to be sent to the lab for biopsy. Cost \$266.15

Yes No

Would you like an anti-inflammatory (NSAID) injection to combat post-operative pain and inflammation? (Additional Cost)

Yes No

Would you like an anti-nausea injection (Cerenia) to combat nausea during or after surgery associated with anesthesia? (Additional Cost)

Yes No

Would you like an E-Collar (cone) to ensure your pet does not disturb the incision site? (Additional Cost)

Yes No

I am the owner, agent, or financially responsible person and have the authority to execute this consent. I hereby consent to the following procedure(s), treatment(s), and/or operations above. I understand that during the performance of the procedure(s), treatment(s), or operation(s) unforeseen conditions may be revealed that necessitate an extension of the above different procedure(s), treatment(s), or operation(s) than those set forth above. I therefore consent to and authorize the performance of such care as is necessary and desirable in the exercise of the veterinarian's professional judgement. I also authorize the use of appropriate anesthetics, and/or other medications, and understand that hospital support personnel will be employed as deemed necessary by the veterinarian. I have been advised of the nature of the procedure(s), treatment(s), and/or operations and am aware that risks are involved. I understand that results cannot be guaranteed. I understand that if my pet has fleas, they will be given a flea treatment product before surgery in order to preserve sterility during the procedure(s). I also understand that I will be charged for the treatment product (\$9.70 - \$10.10). In pets, as in humans, all surgical procedures have the potential of eliciting pain. Preventing pain before it occurs, and managing pain during the recovery period can significantly impact the overall health and wellbeing of your pet. I understand that any invasive surgery performed on my pet requires pain medication to be given as an injection during surgery and as take-home pain medication. Prior to your pet's anesthetic / surgical procedures, **we highly recommend performing a pre – operative blood panel to eliminate as many risks as possible.** These tests allow us to evaluate your pet's health and determine the safest anesthesia protocol.
